

## May 2011- New Release - Double CD By Johnella Bird

### **Imaginatively Entering Children's Worlds: Essential narrative tools for working with children, young people and families**

In this new double CD series you will be introduced to the skills that will enable you to develop a narratively influenced interview style. Johnella uses two 'externalising' exercises to demonstrate how she discovers change-making possibilities *with* children, young people and family members. In the first exercise she demonstrates how to talk with a child who is 'worried about school' while in the second exercise she demonstrates how to work with a teenager who is 'in trouble' at school.

In this CD Series Johnella also reminds us of the imaginative abilities we can use to bring alive characters like George. George is a rather worn hippopotamus, who whispers 'this is the stopping thumb-sucking secret' to a 3 year old?
